1. Location :

The plant is in the northern section of Verkhnaya Tura ($59^{\circ}51'E$ / $58^{\circ}21'N$), Sverdlovsk Oblast, north of a lake.

2. Plant installations :

Soviets stated that parts of the plant existed in the Tsarist time. A large pressing plant was constructed during the war. The machinery of this workshop was dismantled after the war, new bases were cast and the workshop converted to steel casting. The installation of new machines started in early April 1943. A railroad connection was available. The power plant was under construction. For plant layout see Annex.

3. Work force :

Several hundred PWs. No details available on the Soviet work force. (Most of them were convicts).

4. Production :

During the war shell cases, bombs rotating bands for shells (sic); after the war the plant was partially converted to the production of agricultural machines, mainly plows and bruising-mills.

25X1A [] Comment :

- a. It is believed that the plant is the former plant no. 72 with
